

What we market?
What we do?
History of EGE VET

Company Profile

What we market?

- ✓ Imported veterinary vaccines
- ✓ Ata Fen Veterinary vaccines
- ✓ Imported veterinary pharmaceuticals
- ✓ Frozen bovine semen
- ✓ Frozen buck semen
- ✓ De Laval milking equipment and farm supplies
- ✓ A.I. equipments and liquid nitrogen containers
- ✓ Veterinary equipments and tools
- ✓ Feed additives
- ✓ Calf and lamb milk replacer

What we do?

- ✓ Dairy and beef farm consultation services
- ✓ Artificial Insemination
- ✓ Pet clinic
- ✓ Large animal clinic
- ✓ Frozen bovine semen processing
- ✓ Vaccination programs
- ✓ Health and life insurance services for livestock

History of EGE VET

Established by three veterinarians, in 1988. It has extensive and unique marketing network all around Turkey. There are total twenty five salesmen who are responsible for covering certain parts of Turkey. Thirteen of them are veterinarians. There are total eighteen veterinarians who work for EGE VET except three founder partners.

In 1997, EGE VET established the first private Bull Stud of Turkey by importing high quality of US Holstein bulls from USA and Simmental and Brown Swiss bulls from Austria.

In 1999, four imported American Holstein bulls were born for our bull stud by transferring sexed, male frozen embryos. This way of transfer has been done first time in Turkey by EGE VET. More young bulls have been born by transferring imported frozen embryos by EGE VET and joined the breeding bulls at our bull stud.

EGE VET is located in Izmir. It has six branch offices. These offices are located in Istanbul, Ankara, Antalya, Bursa, Hatay and Samsun.

In 2005 **ATA FEN** Inc. has been established as a sister company of **EGE VET**. **ATA FEN** is appointed as the exclusive distributor of **EGE VET**. **ATA FEN** has established a veterinary vaccine manufacturing plant where various bacterial vaccines for veterinary use could be produced. The second stage of the investment is going to be the production of viral veterinary vaccines.

Veterinary Vaccines

Dog and Cat Products

- **Dog Vac R :** Rabies Vaccine (Killed virus)

Large Animal Products

- **Mannheimia Haemolytica & Pasteurella Multocida Bacterin :** Mannheimia Haemolytica-Pasteurella Multocida Bacterin
- **Bovi Sera :** Antiserum (Arcanobacterium pyogenes-Escherichia coli - Mannheimia Haemolytica- Pasteurella multocida - Salmonella typhimurium Antibody)
- **Lepto 5 :** Leptospirosis Vaccine (Leptospira canicola-grippotyphosa-hardjo-icterohaemorrhagiae-pomona bacterin)
- **Mastivac :** Combined Bacterin (Mastitis) (Streptococcus agalactiae- dysgalactiae- uberis- pyogenes, Escherichia coli, Staphylococcus aureus, Arcanobacterium pyogenes)
- **Mastivac TT** Streptococcus agalactiae, Streptococcus dysgalactiae, Streptococcus uberis, Streptococcus pyogenes, Staphylococcus aureus ve Corynebacterium pyogenes
- **Vira Shield 6+ Somnus :** Bovine Rhinotracheitis, Virus Diarrhea, Parainfluenza 3, Respiratory Syncytial Virus Vaccine Killed Virus Haemophilus Somnus Bacterin

Feed Additives

- Sky High Energy
- EDDI
- Amovit Toz (Polvo)
- Amovit Sivi (Liquid)
- Globigen Dia Stop

Milk Replacers

- Classico TU
- Ecomilk 100 TB TU
- Perfecto TU

ATA FEN VETERINARY VACCINE PLANT

Ata Fen Vaccine Manufacturing Plant is located in an area of 8500 square meters. The size of the closed facilities is total of 3330 square meter. In addition, a facility for testing animals is located in area of 400 square meters, as a separate unit.

This facility has been designed for the manufacture of bacterial and viral veterinary vaccines. Right now, the bacterial vaccine unit has been completed. The unit is capable to produce all types of bacterial vaccines. The plant is fully equipped in accordance with the principles and rules of GMP and GLP.

Manufacturing capacity is 28 million doses annually. The first products will be combined Clostridial and E.coli combinations. The other types of bacterial vaccines, such as Pasteurella combinations will be next products to get the official approval from our Ministry.

No second hand equipment has been used in the facility. Water purifying system has a capacity of 300 liter per hour and is operated and controlled by computer system. It has a capacity of storing 3 tons of sterile and purified water.

Clean room conditions, sterile air filtering, sterilization, and filling and packing systems have been designed and installed by following the international standards. Unit for testing animals is being designed by clean room principles and being operated in accordance with animal welfare rules. It is one of the few licensed units in our country.

Founding company Ege Vet has been established in 1988 and always played a leader role in many fields. For instance, in 1997 Ege Vet has established the first private bull stud and semen processing and freezing laboratory in Turkey. As it's the 21st year, Ege Vet is proud of introducing a veterinary vaccine manufacturing plant owned by its sister company Ata Fen, which is in accordance with European Union Standards. This plant will give a great opportunity to our country and also to our neighbour countries.

Ata Fen Veterinary Vaccines

The name of vaccine	Composition	Indications (Diseases)	Dose Amount of 50 ml Vial	Packing size
VBR Chauvoei	Clostridium chauvoei Bacterin-Toxoid	<ul style="list-style-type: none"> • Black Leg Disease 	25 cattle dose or 50 sheep-goat dose	50 ml
VBR K99+C	Escherichia coli K99 and Clostridium perfringens Type C Bacterin-Toxoid	<ul style="list-style-type: none"> • Septicemia • Toxemia 	25 cattle dose or 50 sheep-goat dose	50 ml
VBR Perfringens 3	Clostridium perfringens Type B, Clostridium perfringens Type C and Clostridium perfringens Type D Bacterin-Toxoid	<ul style="list-style-type: none"> • Over Eating Disease (Enterotoxemia or Pulpy Kidney Disease) 	25 cattle dose or 50 sheep-goat dose	50 ml
VBR Polimix 5	Clostridium perfringens Type B, C, D; Clostridium novyi and Clostridium chauvoei Bacterin-Toxoid	<ul style="list-style-type: none"> • Over Eating Disease (Enterotoxemia or Pulpy Kidney Disease) • Necrotic Hepatitis (Black Disease) • Black Leg Disease • Hemorrhagic Enteritis/Struck • Lamb Dysentery 	25 cattle dose or 50 sheep-goat dose	50 ml

Veterinary Pharmaceuticals

Alfamec 1% : Ivermectin

Alfamine 10% : Ketamine HCL

Alfazyne 2%: Xylazine HCL

Amoxyphen 15%: Amoxicillin trihydrate

Calfoset : Calcium Gluconate, Calcium Glycerophosphate, Magnesium Chloride

Co - Trimoxazole : Trimetoprim - Sulfametoxazole

Drymastiphen : Cloxacillin Benzatine (Mastitis - Dry Cow Therapy)

Ege Vet D3 : Vitamin D3

Enjeflox 10%: Enrofloxacin

Injectade : Vitamin A, Vitamin D3, Vitamin E acetate

Juraclox LC : Ampicillin sodium, Cloxacillin sodium

Juramate : Prostaglandine F2 alpha (Cloprostenol Sodium)

Lactomast : Neomycin + Procain Benzyl Penicilline (Mastitis treatment)

Linkospekto-Kombin 5/10: Lincomycin HCl, Spectinomycin HCl

Maksigen : Gentamycin Sulfate

Mames : Spiramycine adipate, Colistimethate sodium, Dexamethasone

Metrisiklin : Chlortetracycline HCl

Moxylan LA : Amoxicillin trihydrate

Mycogal 105: Spiramycine adipate

Nitromectin : Nitroxylnil, Ivermectin

Pituisan : Oxytocine

Polyfil : Phosphorylcholamine, Vitamin A, Vitamin E, Vitamin B12

Prolipen 20/20: Procain Benzyl Penicilline + Dihidrostreptomycine sulfate

Rapidcor : Dexamethazone Sodium Phosphate

Tetraoxyphen L.A. 20% : Oxytetracycline HCl

Vitcomplex : Vitamin A, Vitamin D3, Vitamin B1, Vitamin B2, Vitamin B6, Nicotinamide, Vitamin B12, D-panthenol

Artificial Insemination Equipment

- ✓ 5 Fingers gloves POLYSEM (imported from Polysem France)
- ✓ A.I. Sheath (50/package, Minitüb, imported)
- ✓ Universal A.I. Sheath (0.25-0.50) (Minitüb, imported)
- ✓ Semen Service Container
- ✓ Liquid Nitrogen Container (35 LD)
- ✓ Golden Phoenix Liquid Nitrogen container (6 lt)
- ✓ Golden Phoenix Liquid Nitrogen container (10 lt)
- ✓ Golden Phoenix Liquid Nitrogen container (16 lt)
- ✓ Golden Phoenix Liquid Nitrogen container (35 lt)
- ✓ Cryo Diffusion Liquid Nitrogen Container B 2003 (imported)
- ✓ Cryo Diffusion Liquid Nitrogen Container B 2009 (imported)
- ✓ Thawing Unit (USA)
- ✓ Water Thermometer

Frozen Bovine Semen

The first private bull stud of Turkey has been established by Ege Vet in 1997 in Ulucak- Kemalpaşa region of İzmir. It is fully equipped with high technology equipment for semen processing, freezing and storing.

Five U.S. Holstein bulls of superior quality were imported in 1997 by plane from the U.S.A.

Their names were **Pert**, **Joey**, **Romania**, **Evan** and **Leighton**. The sires of these five bulls were ranking as 2nd, 11th, 54th and 64th at the International Holstein Top 100 list. Ege Vet received the patent right and certification of Turkish Standard Institute for its Spermbank trademark in 1999.

Simmental bull, **Ratl** and Brown Swiss bull, **Trilot** were imported from Austria in 1999. These two bulls have been introduced to Turkish dairy and beef farmers as alternative breeds.

Ege Vet has also performed the first frozen embryo transfer in Turkey for achieving young bulls for its bull stud. In 1999, full blood, high quality Holstein young bulls were born through frozen, male U.S. Holstein embryos. These four young Holstein bulls were named as **Jed**, **Mascot**, **Etazon** and **Dr Carmichael**. The semen from these bulls is also collected, processed, stored and distributed.

Ege Vet is offering high quality genetics to Turkish dairy and beef farmers in the form of frozen bovine semen at a reasonable cost.

Ege Vet has been importing frozen semen from high quality U.S. proven bulls since 1989 and distributing them all around Turkey. Marketing high quality, proven U.S. bovine semen has been a major segment of Ege Vet's business.

Ege Vet is the exclusive distributor of World Wire Sires (WWS) in Turkey. Turkish agriculture and livestock business will benefit a lot from this great cooperation. Ege Vet and WWS are also cooperating on offering E.T. service and high quality US embryos to Turkish farmers soon.

Ege Vet is in the position of being able to offer and provide the semen of various genetic criteria at a wide price range. Ege Vet is proud of its unique and efficient marketing network that covers all around Turkey.
